Summary

Computer Science junior with a strong grasp of modern web technologies, passionate about writing clean, efficient code that solves real-world problems. Experienced in building web applications and continuously learning to improve system design and development practices.

Education

B.S. Computer Science, FAST National University 2023 – 2027
CGPA: 3.12 / 4.00

Intermediate, Cadet College Petaro 2020 – 2022
Percentage: 90%

Matriculation, Cadet College Petaro 2018 – 2020
Percentage: 84%

Technical Skills

Languages: JavaScript, TypeScript, Python, C, C++, SQL
Frameworks / Libraries: React.js, Node.js, Express.js, Django REST Framework, SFML
Databases / BaaS: PostgreSQL, MongoDB, MySQL, Redis, Supabase
Tools / Productivity: Git, GitHub Actions, Linux (Debian), Docker, Bash Scripting, Figma, Vercel

Experience

Head, Guilty by Data – FAST NUCES Jan 2026 – June 2026
- Led Guilty by Data, an investigative data-driven contest for ACM Developers' Day, with participation from students across different universities.
- Designed and developed the contest platform, including participant login, timed rounds, leaderboard tracking, admin workflows, question design, and dataset preparation.

Co-Head, CodeSprint – FAST NUCES March 2025 – January 2026
- Co-led development of a full-stack platform for a university coding competition, enabling smooth participant registration, contest management, problem access, and a live scoreboard with real-time result tracking.

Head of Workshop Team – GitHub Society, FAST NUCES Aug 2024 – Present
- Led hands-on workshops on Git and GitHub workflows, collaborative development practices, and effective use of GitHub Copilot.

Projects

FORKED NUCES | *Next.js, Python, Django REST Framework, PostgreSQL, Redis, Docker*
- Developed a community-driven platform for FAST-NUCES students enabling NU-domain–verified users to open-source their projects within the university and collaborate across batches.
- Enabled students to complete stalled projects by connecting them with skill-matched collaborators.

Investment Recommendation System | *Python, Pandas, Scikit-learn, Streamlit*
- Developed a recommendation system that suggests stocks and funds to invest in based on user preferences using content-based and user-based filtering techniques.
- Integrated financial datasets and built portfolio recommendations with interactive visualizations for investment insights.

Guilty by Data | *React.js, Supabase, Vercel*
- Built a full-stack investigative competition platform with participant login, three structured rounds, timed challenges, round-wise progression, and leaderboard tracking.
- Developed an admin dashboard for inserting questions and managing contest content, paired with an immersive investigative interface for a mystery-solving experience.
